

Pragati Pratishthan - Report on

Tap Water Scheme @Moreshwar Wadi, Mokhada

Liquid Lifeline: Moreshwarwadi's Water Transformation

Introduction

In a collaborative effort involving the Rotary Club Thane West, Pragati Pratishthan, and with the financial support of Envirocare Labs, A significant milestone was achieved with the inauguration of the Tap Water Scheme on December 27, 2022, at Moreshwarwadi in Mokhada, District - Palghar. Moreshwarwadi village, nestled 27 kilometers away from Mokhada taluka, stands as a remote and secluded settlement. With a mere 18 families and a population of 94, this village is blessed with an abundant wellspring of water. However, the women of the village were burdened with the arduous task of fetching water from a distant source, approximately one kilometer away.

Driven by a commitment to enhance the quality of life for Moreshwarwadi's residents, a comprehensive survey was conducted after engaging in meaningful discussions with the villagers. The outcome of this endeavor culminated in the construction of four strategically placed stand posts within the village, ensuring the seamless availability of clean and safe water to its residents.

Current Status and Maintenance of the Tap Water Scheme:

- A dedicated savings account for the tap water scheme has been established, with account number 98850100006842 at the Bank of Baroda, Asse branch.
- Regular contributions into the account have resulted in a substantial balance of ₹15,600.
- The villagers have diligently planned the operation schedule for the water pump, ensuring the timely release of water throughout the village.
- All standposts and taps within the scheme are maintained in excellent condition.
- A few minor leakages in the scheme's tanks are being addressed promptly.
- The pipeline infrastructure remains in optimal condition.
- The pumps and panels are well-maintained, and the filtration system is operational.

-
- The tap water scheme continues to operate efficiently, delivering its intended benefits to the community.

Village Reaction:

Since the implementation of the tap water scheme, the residents of Moreshwarwadi have experienced a transformative change in their daily lives. The considerable time saved in fetching water has allowed them to redirect their focus towards agriculture and the nurturing of their children. Furthermore, the hazardous journey to the well, particularly during the monsoon season, has been eliminated, reducing the risk of accidents and injuries.

The Tap Water Scheme has not only quenched the village's thirst but has also ushered in newfound opportunities for growth, prosperity, and safety, ultimately enriching the lives of its residents.
